The Emeraude association of municipalities awards household waste collection to the Derichebourg group

The Derichebourg group won the contract for household and assimilated waste collection in the tender launched by the Emeraude association of municipalities (Val d'Oise, France). This contract represents revenue of €80 million over its full seven-year period. Starting on March 1 of this year, Derichebourg Environnement will ensure household waste collection delivered by and directly from the homes of the 271,000 residents of the area's 17 municipalities.

The group relied on its extensive experience and quality services to submit a high value-added technical solution for the tender.

In this spirit of excellence, a complete restructuring of collection was proposed that optimized dual equipment use.

The Derichebourg group will support the association in a sorting performance action plan to increase the tonnage of recyclables collected in the region. A dedicated team of sorting ambassadors will be deployed upon the start of the contract.

This action plan is accompanied by the installation of fill rate sensors at all voluntary packaging drop-off sites to ensure optimal management of container fill levels.

The Derichebourg group opted for innovation, performance and sustainable development, in particular via the commissioning of a fleet of new vehicles equipped with a system for recovering kinetic energy from braking. This energy is used to power the container lifts, thus significantly reducing greenhouse gas emissions.

All the teams are now mobilized to ensure the deployment of the 40 new vehicles, the introduction of the new organization and the company's triple Quality, Safety and Environment certification (ISO 9001 – 14001 & 18001).

The Derichebourg group is a key player providing services to businesses and municipalities in the international arena.

With more than 34,000 employees in 14 countries on three continents, Derichebourg registered €2,147.5 million in revenue in fiscal year 2015-2016.

Derichebourg rolls out its globally recognized expertise in two complementary business sectors:

- environmental services (recycling, waste recuperation, household waste collection, urban cleaning, waste center management, sorting centers, water treatment, etc.),
- business services (cleaning, energy, temporary staffing, aeronautics, services in sensitive environments, etc.).

Derichebourg is listed on Euronext Paris, compartment B, and is a member of the CAC All Shares index.
ISIN code: FR0000053381 - ticker symbol: DBG.
